IBM Skills Build for University Engagements

AICTE-2026

Problem Statements on Agentic AI

Problem Statement No.1 - Research Agent

The Challenge- A **Research Agent** is an AI system designed to assist with academic and scientific research tasks. It can autonomously search for literature, summarize papers, and organize references. Using natural language processing, it understands research questions and retrieves relevant information.
The agent can generate reports, suggest hypotheses, and even draft sections of research papers.
It saves time by automating repetitive tasks like citation management and data extraction.
Research Agents enhance efficiency, accuracy, and innovation in both academic and industrial R&D.

Technology - Use of IBM cloud lite services /IBM Granite is mandatory.
